Frontend Developer | Tashkent

+998 (94) 514 24 01 | [umamatraximov@gmail.com](mailto:umamatraximov@gmail.com)

## Summary

Frontend developer with 1.5+ years of experience. My main stack these days is Frontend (ReactJs & NextJs). During my career, I have completed various projects such as CRM platforms, sales sites, online learning platforms. I constantly learn new technologies and work more on myself.

## Experience

### Frontend Developer LIMSA

February 2024 - Current

- Used JavaScript and other technologies to help create the project's intricate partitioning.
- Development using React technologies for web-based versions of books.

### Frontend Developer ITA

December 2022- January 2024

- Actively participated in a local Avtozom project, analyzed the project criteria, and created maintainable and scalable modules using technology that met and exceeded performance goals.
- I worked on a complex enterprise application using React and Redux or Context. I was responsible for creating reusable components, managing the state of the application, and integrating with the backend API

## Projects

[Avtozoom](#) | During the development of the Auto Zoom website, I learned to work collaboratively. I participated in this project as a team leader and learned to use new technologies like Trello and Jira.

[Np Fabric](#) | While developing the Np Fabric website, I learned to work effectively with react-router dom. The useParams, useRef, and useLocation hooks greatly facilitated website navigation.

[Prime Build](#) | I used the AOS library, rich in various animations, in the development of the Prime Build web application. I also learned how to send a message to a telegram bot without a backend through a web application.

[Discover Invest](#) | I often used Bootstrap or SCSS technologies for my websites. However, for this particular website, I learned and applied Tailwind. I realized that Tailwind works much faster and more efficiently compared to Bootstrap and SCSS.

[Future Travel](#) | Developing the Future Travel website gave me the opportunity to get acquainted with the react-i18next and react-slick libraries. I learned how to change the page's language using i18next and add various carousel effects to the page using react-slick.

## Skills

HTML5, CSS3, SASS, Tailwind, Bootstrap, JavaScript, ReactJs, NextJs, Redux, RESTful API, Git, Trello, Jira

## Education

Tashkent University of Information Technologies | Telecommunication

Sep 2019 - Jun 2023

Zako IT academy | Frontend Internship

January 2022 - September 2022

[Languages](#) Uzbek(Native), English(Intermediate).
